

From the Director

The fourth quarter of 2019 ended with news of a South Carolina Department of Commerce Office of Innovation Relentless Challenge grant award notification for our project, *Technology Product Development Training*. The awarded amount is \$65,000 and the grant requires a dollar for dollar match from non-state entities. We will be working with entrepreneurs that have product ideas with scalable potential, beginning with an [informational seminar](#) in early 2020 open to BASEcamp residents, BDC members, and the public. Training will be in partnership with USCB Computer Science faculty and students, as well as our mentor and professional network.

We were mentioned in the Chamber's Regional Economic Forecast, and we had a cameo in the City of Beaufort Economic Development video release. We will take part in Converge: The 2020 Lowcountry Economic Development Summit, put on by Beaufort County Economic Development.

RESIDENT UPDATES

Lowcountry Analytics moved in to Station #6, helping companies identify their unique opportunities for growth and supporting them in the creation of strategies that utilize information to achieve desired results.

A startup (name tba) moved in to Station #8, developing software for small to medium-sized businesses that accesses sales and labor data from the users' POS system via dashboard reporting in real-time- allowing the user to quickly see pivotal metrics.

NEW MEMBERS
